

## Travel Size Prescription Bottles Available

In response to requests by EEHP members for smaller size prescription bottles allowing for easier packing when traveling, Caremark has a solution. EEHP plan members can request smaller size bottles when ordering mail order medication or by phoning in and requesting smaller travel bottles at any time.

When a plan participant calls and requests a smaller bottle, Caremark will create a new label for that exact prescription, attach it to the new empty smaller bottle, and mail it to the participant.

When calling Caremark, it is best to have the prescription number ready and indicate the need for child safety lids or not. The travel bottle process is available for solid dosage forms (tablets or capsules) as well as liquids and unit -of- use or packaged items (such as respiratory treatments).

The EEHP Trustees hope this service by Caremark will make your travel just a little bit easier.
